Employment Summary

Publicis.Sapient September 14th, 2015 - Present

Interactive Developer L1

I worked in a team of developers, designers, project managers, and clients developing a multitude of web applications utilizing PHP and various JavaScript frameworks such as Backbone.js and React.js. I also assisted in scrum planning, sprint planning, and scaffolding development environments.

UEstate June 2nd, 2014 - August 22nd, 2014

Chief Technology Officer

Assisted within a start up business that dealt with online real estate. I facilitated the division of work and oversaw the development of their website while also actively participating with development.

University of Arizona May 29th, 2014 - August 22nd, 2014

Intern

Created a framework for a "cleverbot" in HTML5 using Webster's dictionary API that included rough segmentation based on real-time user input. Designed a web-based administrator tool that would edit an offsite file and return it back to the user. Developed a mobile app using jQuery Mobile for medical students to look up prices for medical procedures while using a mobile device.

ICS Support Lab October 2011 - May 2013

Student Peer Tutor

Tutored at the ICS Support lab in all of the skills listed above. Some students needed more help than others and I was more than willing to assist them.
